

MAPPING NTU'S BIODIVERSITY

NTU is home to over 390 species of wildlife. Addressing threats and conserving wildlife today have become more urgent than ever before.

Fauna Species Recorded on Campus as of AY 22/23

28

Dragonflies & Damselflies

90

Butterflies

10

Mammals

20

Reptiles

139

Birds

24

Spiders

22

Bees & Wasps

MRT Line Construction

The forthcoming railway will pose concern through habitat fragmentation, habitat loss and exposure to pollution.

Tree Planting

With the hope that they will eventually contribute to the ecological connectivity in the area, tree saplings were planted in the vicinity. Intensified reforestation at available areas is needed to buffer the effects of campus deforestation.

Bird-window Collision

Buildings with extensive windows are more prone to bird strikes as birds tend to perceive only the reflection of the greenery behind them.

Wildlife Hotspots

- 1 Little Bronze Cuckoo

2 Large-tailed Nightjar

3 Bronze Flutterer

4 Common Birdwing

5 Straw-headed Bulbul

6 Changeable Hawk-eagle

7 Atlas Moth

8 Spotted Wood Owl

9 Oriental Dwarf Kingfisher

10 Common Palm Civet

11 Red-breasted Parakeet

12 Huntsman Spider

13 Oriental Whip Snake

14 Plantain Squirrel

15 Lesser Dog-faced Fruit Bat

16 Asian Emerald Dove

17 Smooth-coated Otter

18 Wild Boar

19 Paradise Tree Snake

20 Crimson Dropwing

21 Malaysian Pied Fantail
